Subject: 10/14 Tonawanda Coke Plant Air Surveillance Status Report

SERAS arrived on-site at approximately 8pm and began deploying equipment at the pre-determined locations. By midnight, 5 stations were established at the following locations:

- TCP 01 - Tonawanda Coke Plant Guardhouse
- TCP 02 - River Road Volunteer Fire Stations
- TCP 03 - Sheridan Fire District
- TCP 04 – DEC Grand Island Boulevard Station
- TCP 05 – DEC Brookside Terrace Station

In addition to VOC, SO2 and Particulate real-time monitoring, a summa cannister was placed at each location. The samples will be collected tomorrow evening in time to be processed and shipped to Edison by 8pm Monday, for a Tuesday AM delivery.

ERT will continue to monitor these stations and ensure their effective operation. Per conversation with OSC Harrington, since all locations have shore power we will not be staffing 24/7 but will adjust staffing if site conditions or instrument operations change.
